LARGE SQUARE BALER TWINE

Our range of HD large square baler twines feature Knot-Tech technology - a physical enhancement designed to boost knot grip.

POPE SUPERIOR HD Baler Twine

SUPERIOR HD is an extreme tensile strength baler twine in a compact 10 kg spool. It is designed for use in all modern HD balers and is ideal for baling straw or springy crops where internal baler pressures are extreme. SUPERIOR HD includes our proprietary Knot-Tech technology and is UV stabilised for Australia's harsh conditions.

**Knot-Tech technology | All modern HD balers | Compact spool | UV stabilised
Extreme tensile strength | Consistent performance | Great value**

BLUE TIGER PLUS HD Baler Twine

BLUE TIGER PLUS HD combines high tensile strength with long running spools, making it the ideal choice for contractors looking to increase efficiency through fewer spool changes. At a manageable 11.6 kgs per 1250 m spool, BLUE TIGER PLUS HD was developed and tested in Australia with professional contractors who demand trouble-free high density baling all year round. BLUE TIGER PLUS includes Knot-Tech and is UV stabilised for Australia's harsh conditions.

**Knot-Tech technology | Long running spool | UV stabilised | High tensile strength
Consistent performance | Great value**

POPE BLUE TIGER XXX HD Baler Twine

BLUE TIGER XXX HD has the same high tensile strength and knot-grip performance as BLUE TIGER PLUS but in a more compact spool size allowing it to fit in all HD balers. Like its bigger brother, BLUE TIGER XXX HD was developed and tested in Australia with professional contractors who demand trouble-free high density baling all year round. BLUE TIGER XXX HD includes Knot-Tech and is UV stabilised for Australia's harsh conditions.

**Knot-Tech technology | Compact spool | UV stabilised | All modern HD balers | High tensile strength
Consistent performance | Great value**

POPE BLUE TIGER™ HD Baler Twine

BLUE TIGER HD combines superior value with outstanding performance to deliver efficiency gains to professional hay producers.

Superior knot performance | UV stabilised | Consistent performance

POPE RHINO PLUS Big Square Baler Twine

POPE RHINO PLUS Big Square Baler Twine was developed with the professional contractor in mind. With 1400 m spools and consistent baling performance, Rhino Plus delivers greater baling efficiencies and more bales per day.

Strong knot performance | UV stabilised | Long running spool

POPE BULLDOG Large Square Blue Baler Twine

BULLDOG BLUE represents years of development and applied know-how. With enhanced fibrillation during manufacturing and a spool length of 1220 m, BULLDOG BLUE is the ideal choice for contractors and hay producers looking for consistent knot performance and long running spools.

**Excellent knot performance | UV stabilised | Long running spool | Consistent performance
Trouble-free spooling | Enhanced fibrillation for better knot resistance**

SMALL SQUARE BALER TWINE

POPE RHINO Small Square Baler Twine

RHINO is a premium quality small square baler twine. With a knot strength of 110 kgf, Rhino is ideal for heavy lucerne or pasture hay.

Rhino is available in two convenient spool sizes:

Rhino Small Square, a 1500 m compact spool suitable for all small square balers.

Rhino Small Square Plus, a 2500 m spool for increased baler efficiency.

Bright yellow | Long running or compact spool | UV stabilised
High tensile strength | Consistent performance | Great value

BULLDOG BLUE Small Square Twine

Bulldog Blue is a consistent performer bale after bale. It is available in two convenient pack sizes.

Knot stability and grip | UV protected | Easy feed and soft on knotters | **Bright blue**

ROUND BALER TWINE

BULLDOG BIG ROLL Baler Twine is available in two convenient pack sizes.

Perfect spooling | **Knot stability and grip** | **UV protected**
Easy feed and soft on knotters | **Bright blue**

THOR TWINES

Introducing the new Thor range of fibrillated baler twines. The most technologically advanced twine on the market.

TITELOC TECH

Made for Australian conditions and featuring **Titeloc Tech**

Thor twines are manufactured on a state-of-the-art EVOTAPE extruder and feature our unique TiteLoc fibrillation technology. TiteLoc increases knot holding capability compared to standard polypropylene twines of the same runnage (m/kg).

Knot slip is the primary cause of failed “popped” knots resulting in bale breakage. With Titeloc you save time and money by having fewer knot slips and broken bales.

All Thor twines are UV stabilised for Australian conditions and feature Titeloc technology for better knot performance.

Application	Code	Brand	Colour	Length/spool	Spool Weight	Spools/Pack	Knot resistance	Packs/Pallet
Large Square/HD	1100011875	THOR 200	Orange	1150 m	10.0 kg	2	240 kgf	24

BALE NETWRAP

MEGANET bale netwrap has excellent tensile strength, high resistance to tearing, and maximum protection against UV radiation. Meganet is the best solution for perfect baling and is recognised by farmers and contractors worldwide for its reliable performance, even under the harshest conditions. As a premium bale netwrap, Meganet provides consistent and uniform bale coverage even during fast baling. It is suitable for all crops (straw, silage, corn, pasture, and cereal hay) and works under all weather conditions. Meganet is your best choice for round baling:

Compatible with all popular balers | High breaking strength | Maximum bale coverage | UV stabilised and antistatic treated | End-of-roll warning

Introducing MAGLIA GRANDE

Maglia Grande® is a wide mesh netwrap with 25 reinforced chains resulting in one of the strongest bale netwraps available on the market.

Designed for modern balers | Extreme strength | UV stabilised | Improved bale compression

Does your netwrap carry the Signum Test DLG approval stamp?

SILAGE COVERS

Pope's Rhino silage covers are made of high quality co-extruded polyethylene. And are UV and heat stabilised to protect against Australia's harsh conditions for a minimum of 12 months. Rhino silage covers have a white reflective outer layer and a black airtight inner layer to ensure quality silage production.

Rhino silage covers are available in two gauges and are suitable for use in bunkers and silage pits.

High strength | Impact resistant | 12 months UV protection
Multilayer construction

Code	Brand	Colour	Size	Thickness
1100011937	Rhino Silage Cover	Black/White	12 m x 50 m	150 um
1100011938	Rhino Silage Cover	Black/White	12 m x 50 m	200 um
1100011940	Rhino Silage Cover	Black/White	15 m x 50 m	200 um
1100011942	Rhino Silage Cover	Black/White	18 m x 50 m	200 um

SILAGE INOCULANT

MAGNIVA Classic is a research based field proven blend of two selected specific bacterial strains and high activity enzymes. This combination results in rapid silage fermentation and pH drop, which reduces dry matter losses and maximises feed quality, digestibility and dry matter intake.

MAGNIVA Classic is suitable for all forage types.

Advantages

Lower pH quickly | Reduced DM losses by controlling the fermentation process | Specific enzymes to release sugars to assist the bacteria drive the fermentation

Benefits

Quickly preserves forages | Higher feed quality and nutritional value preservation | More silage to feed

MAGNIVA Classic is available in 50 treated tonne and 250 treated tonne sachet sizes.

MAGNIVA Classic delivers silage with more retained dry matter and higher nutritional value. Better silage can help you maximise the energy and nutrient content of your feed ration.

SILAGE FILM

SUN XTRA STRETCH Pro 7 Silage Film is a premium co-extruded 7-layer film developed for those contractors looking for consistent performance bale after bale.

As a 7-layer film, SUN XTRA STRETCH Pro 7 has less variability in film thickness and strength and is less prone to tearing or breaking.

Good silage quality relies on the film sealing in the nutrient-rich goodness while preventing oxygen ingress. SUN XTRA STRETCH Pro 7 produces excellent results for all silage applications because of its tight tolerances and outstanding performance.

7-layer construction | UV stabilised for Australian conditions
Ideal for high-speed wrapping | Suitable for round or square bales
High tack level for a superior oxygen barrier | Consistent performance
Plastic core | 50 - 70 % stretch

SUN XTRA STRETCH Pro 7 Benefits:

- Consistent quality silage production
- Maintains the feed's nutrient value
- Tighter wrapped bales
- Excellent bale protection
- Suitable for large square and round bales

POPE ADVANTAGE 5 Silage Film is a premium European film. Advantage 5 is a 5-layer silage film suited to all wrapping machines. Its formulation and construction provide the perfect oxygen-free ensiling conditions to produce quality silage.

Advantage 5 has optimal levels of tackiness ensuing tight silage bales. It is UV stabilised for Australian conditions and is the perfect solution for silage producers seeking trouble-free wrapping.

**UV stabilised | Superior strength and tack | High oxygen barrier
5-layer construction | 50 - 70 % stretch | Plastic core**

HARVEST ADVANTAGE 5 Silage Film is a price competitive 5-layer film. It fits all wrapping machines and has the right level of tackiness and elasticity to produce quality silage bales even under extreme conditions.

Harvest Advantage 5 is a consistent performer and represents excellent value for money.

**UV stabilised | Puncture and tear resistant | High oxygen barrier
5-layer construction | 50 - 70 % stretch | Plastic core**

POPE BULLDOG™ Silage Film is our most price-efficient wrap. Tried and true, Bulldog film is the economical choice designed for use on all wrapping machines. It is UV stabilised and has the right level of tackiness and elasticity.

**50 - 70 % stretch | UV stabilised | Plastic core | Light green
25 um and 30 um**

Rhino - Pro7

Farm Storage Bag

Best Quality, Great Price

Rhino - Pro7 Farm Storage Bags are a cost-effective way to store coarse grains on-farm. They provide a short-term storage solution that improves grain logistics and marketing choices at harvest.

Rhino - Pro7 Farm Storage Bags are ideal for the storage of grains including wheat, barley, oats, triticale, sorghum and maize. Manufactured to strict ISO 9001 QA standards, Rhino - Pro7 Farm Storage Bags are formulated with quality polymer resins to produce a seven-layered co-extruded polyethylene film. The reflective white outer layers contain heat resistant resins and UV stabilisers to protect against Australia's harsh UV and heat conditions. The black inner layer shields against light and moisture. Rhino - Pro7 Farm Storage Bags fit 9 ft (2.75 m) diameter grain inloaders.

Features & Benefits:

7-layer quality film for better performance | 250 um thickness for strength and durability | Heat and UV stabilised for Australia's harsh conditions | 9 ft (2.75 m) diameter | Puncture and impact resistance | Tear resistance 10 % Stretch for tight packing

Code	Brand	Diameter	Length	Thickness	Bags/Pallet
1100011591	RHINO - Pro7	9 ft (2.75 m)	75 m	250 um	8
1100011592	RHINO - Pro7	9 ft (2.75 m)	90 m	250 um	8

NET REPLACEMENT FILM

POPE NET REPLACEMENT FILM is of 5-layer co-extruded construction and is suited to round balers with film capability. Film on film silage production has many benefits over traditional film on balenet systems. These include:

Improved silage quality due to better oxygen barrier and tighter bales | Easy removal of film at feeding time | 100 % recyclable with silage film | Higher density bales | 16 um
