Crop Packaging Product Range

Packaging Partners since 1956

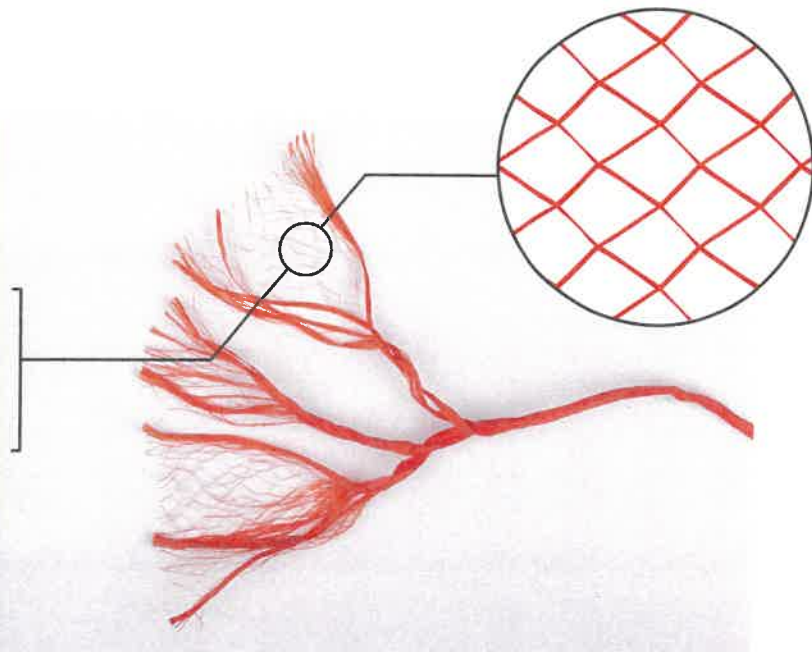

The Thor range of fibrillated baler twines is the most technologically advanced twine on the market.

TITELOC TECH

Unique multi-fibre fibrillated lattice structure for better grip and performance

Made for Australian conditions and featuring **Titeloc Tech**

Thor twines are manufactured on a state-of-the-art EVOTAPE extruder and feature our unique TiteLoc fibrillation technology. TiteLoc increases knot holding capability compared to standard polypropylene twines of the same runnage (m/kg).

Knot slip is the primary cause of failed “popped” knots resulting in bale breakage. With Titeloc you save time and money by having minimal knot slips and broken bales.

All Thor twines are UV stabilised for Australian conditions and feature Titeloc technology for better knot performance.

LARGE SQUARE BALER TWINE

Our range of HD large square baler twines feature Knot-Tech technology - a physical enhancement designed to boost knot grip.

BLUE TIGER PLUS HD Baler Twine

BLUE TIGER PLUS HD combines high tensile strength with long running spools, making it the ideal choice for contractors looking to increase efficiency through fewer spool changes. At a manageable 11.6 kgs per 1250 m spool, BLUE TIGER PLUS HD was developed and tested in Australia with professional contractors who demand trouble-free high density baling all year round. BLUE TIGER PLUS includes Knot-Tech and is UV stabilised for Australia's harsh conditions.

**Knot-Tech technology | Long running spool | UV stabilised | High tensile strength
Consistent performance | Great value**

POPE BLUE TIGER XXX HD Baler Twine

BLUE TIGER XXX HD has the same high tensile strength and knot-grip performance as BLUE TIGER PLUS but in a more compact spool size allowing it to fit in all HD balers. Like its bigger brother, BLUE TIGER XXX HD was developed and tested in Australia with professional contractors who demand trouble-free high density baling all year round. BLUE TIGER XXX HD includes Knot-Tech and is UV stabilised for Australia's harsh conditions.

Knot-Tech technology | Compact spool | UV stabilised | All modern HD balers | High tensile strength | Consistent performance | Great value

NEW POPE BLUE TIGER XXX HD NF Baler Twine

BLUE TIGER XXX HD NF combines high tensile strength with TITELOC fibrillation technology. TITELOC increases knot holding capacity compared to standard polypropylene twines of the same runnage (m/kg). U/V Stabilised For Australian Conditions.

Titeloc Fibrillation | Compact Spool | UV stabilised | High Strength

POPE BLUE TIGER™ HD Baler Twine

BLUE TIGER HD combines superior value with outstanding performance to deliver efficiency gains to professional hay producers. U/V Stabilised For Australian Conditions.

Superior knot performance | UV stabilised | Consistent performance

POPE RHINO PLUS Big Square Baler Twine

POPE RHINO PLUS Big Square Baler Twine was developed with the professional contractor in mind. With 1400 m spools and consistent baling performance, Rhino Plus delivers greater baling efficiencies and more bales per day. U/V Stabilised For Australian Conditions.

Strong knot performance | UV stabilised | Long running spool

| Application | Code | Brand | Colour | Length/Spool | Spool Weight | Spools/Pack | Knot Resistance | Packs/Pallet |

| HD LARGE SQUARE | 1100010307 | Rhino Plus | Yellow | 1400 m | 10.9 kg | 2 | 220 kgf | 24 |

SMALL SQUARE BALER TWINE

POPE RHINO Small Square Baler Twine

RHINO is a premium quality small square baler twine. With a knot strength of 110 kgf, Rhino is ideal for heavy lucerne or pasture hay.

Rhino is available in two convenient spool sizes:

Rhino Small Square, a 1500 m compact spool suitable for all small square balers.

Rhino Small Square Plus, a 2500 m spool for increased baler efficiency.

Bright yellow | Long running or compact spool | UV stabilised
High tensile strength | Consistent performance | Great value

BULLDOG BLUE Small Square Twine

Bulldog Blue is a consistent performer bale after bale. It is available in three convenient pack sizes.

Knot stability and grip | UV protected
Easy feed and soft on knotters
Bright blue

ROUND BALER TWINE

BULLDOG BIG ROLL Baler Twine is available in bright blue or pink.

Perfect spooling | Knot stability and grip | UV protected
Easy feed and soft on knotters

SILAGE INOCULANT and NET REPLACEMENT FILM

SILAGE INOCULANT

MAGNIVA Classic is a research based field proven blend of two selected specific bacterial strains and high activity enzymes. This combination results in rapid silage fermentation and pH drop, which reduces dry matter losses and maximises feed quality, digestibility and dry matter intake. MAGNIVA Classic is suitable for all forage types.

Advantages

Lower pH quickly | Reduced DM losses by controlling the fermentation process | Specific enzymes to release sugars to assist the bacteria drive the fermentation

Benefits

Quickly preserves forages | Higher feed quality and nutritional value preservation | More silage to feed

MAGNIVA Classic is available in 50 treated tonne and 250 treated tonne sachet sizes.

MAGNIVA Classic delivers silage with more retained dry matter and higher nutritional value. Better silage can help you maximise the energy and nutrient content of your feed ration.

NET REPLACEMENT FILM

POPE NET REPLACEMENT FILM is of 5-layer co-extruded construction and is suited to round balers with film capability. Film on film silage production has many benefits over traditional film on balenet systems. These include:

Improved silage quality due to better oxygen barrier and tighter bales | Easy removal of film at feeding time | 100 % recyclable with silage film | Higher density bales | 16 um

| Code | Brand | Colour | Width/Roll | Length/Roll | Thickness | Core Material | Rolls/Pallet |
|------------|---------------------------|--------|------------|-------------|-----------|---------------|---------------------|
| 1100013651 | Pope Net Replacement Film | White | 1.28 m | 1800m | 19 um | Cardboard | 20 |
| 110013652 | Pope Net Replacement Film | White | 1.38 m | 1800 m | 19 um | Cardboard | 20 |
| 1100011676 | Silage Film Repair tape | White | 10 cm | 20 m | 25 um | Cardboard | 48 Rolls/ Carton |

POPE RHINO SILAGE COVERS

POPE'S RHINO silage covers are crafted with premium co-extruded polyethylene and are stabilized against UV and heat, ensuring protection in Australia's harsh environment for at least 12 months. The covers feature a white reflective outer layer and a black airtight inner layer for efficient silage production. They come in two gauges and are ideal for bunkers, modules, and silage pits.

- High strength
- Impact resistant
- 12-month UV protection
- Multilayer construction

NEW

POPE RHINO COMBI SILAGE COVERS

60
times more
effective

Pope Rhino Combi features the oxygen seal blue liner, a 45 micron impermeable film that prevents oxygen from entering silage. This 9-layer film is lightweight yet strong and easy to handle. Its unique oxygen barrier is 60 times more effective than traditional silage sheeting, reducing DM losses, minimising waste, and improving aerobic stability.

| Code | Brand | Colour | Size | Thickness |

BALE NETWRAP

MEGANET bale netwrap has excellent tensile strength, high resistance to tearing, and maximum protection against UV radiation. Meganet is the best solution for perfect baling and is recognised by farmers and contractors worldwide for its reliable performance, even under the harshest conditions. As a premium bale netwrap, Meganet provides consistent and uniform bale coverage even during fast baling. It is suitable for all crops (straw, silage, corn, pasture, and cereal hay) and works under all weather conditions. Meganet is your best choice for round baling:

Compatible with all popular balers | High breaking strength | Maximum bale coverage
UV stabilised and antistatic treated | End-of-roll warning | Available in rolls up to 4500 m

MAGLIA GRANDE

If you are looking for a high-quality netwrap that can handle any forage crop, look no further than Maglia Grande. This netwrap has 25 reinforced chains that create a wide mesh, which gives it amazing strength and durability. Whether you are wrapping straw, silage, corn, pasture, or cereal hay, Maglia Grande will keep your bales secure and protected. It also comes in different widths to fit any size of bale.

Designed for modern balers | Extreme strength | UV stabilised | Improved bale compression

Does your netwrap carry the Signum Test DLG approval stamp?

POPE BULLDOG™ Silage Film

POPE BULLDOG™ Silage Film is our most price-efficient wrap. Tried and true, Bulldog film is the economical choice designed for use on all wrapping machines. It is UV stabilised and has the right level of tackiness and elasticity.

**50 - 70 % stretch | 5-layer construction
UV stabilised | Plastic core | Light green
21 um, 25 um and 30 um**

Pope Bulldog Silage Film Benefits:

- Value for money
- Proven consistency
- Trouble-free wrapping
- Formulated for Australian conditions
- Ideal for large square and round bales
- Suitable for line wrapping

TIGER SUN XTRA STRETCH Pro 7 Silage Film

TIGER SUN XTRA STRETCH Pro 7 Silage Film is a premium co-extruded 7-layer film developed for those contractors looking for consistent performance bale after bale.

As a 7-layer film, TIGER SUN XTRA STRETCH Pro 7 has less variability in film thickness and strength and is less prone to tearing or breaking.

Good silage quality relies on the film sealing in the nutrient-rich goodness while preventing oxygen ingress. TIGER SUN XTRA STRETCH Pro 7 produces excellent results for all silage applications because of its tight tolerances and outstanding performance.

7-layer construction | UV stabilised for Australian conditions | Ideal for high-speed wrapping | Suitable for round or square bales | High tack level for a superior oxygen barrier | Consistent performance Plastic core 50 - 70 % stretch

HARVEST ADVANTAGE 5 Silage Film

HARVEST ADVANTAGE 5 Silage Film is a price competitive 5-layer film. It fits all wrapping machines and has the right level of tackiness and elasticity to produce quality silage bales even under extreme conditions.

Harvest Advantage 5 is a consistent performer and represents excellent value for money.

UV stabilised | Puncture and tear resistant | High oxygen barrier | 5-layer construction | 50 - 70 % stretch Plastic core

Rhino - Pro7

Farm Storage Bag

Best Quality, Great Price

Rhino - Pro7 Farm Storage Bags are a cost-effective way to store coarse grains on-farm. They provide a short-term storage solution that improves grain logistics and marketing choices at harvest.

Rhino - Pro7 Farm Storage Bags are ideal for storing wheat, barley, oats, triticale, sorghum, maize and silage.

Manufactured to strict ISO 9001 QA standards, Rhino - Pro7 Farm Storage Bags are formulated with quality polymer resins to produce a seven-layered co-extruded polyethylene film. The reflective white outer layers contain heat resistant resins and UV stabilisers to protect against Australia's harsh UV and heat conditions. The black inner layer shields against light and moisture. Store your grain securely with Rhino - Pro7 Farm Storage Bags. They are available in two sizes that can accommodate grain inloaders with diameters of 9 ft (2.75 m) or 10 ft (3.05 m).

Features & Benefits:

7-layer quality film for better performance | 250 um thickness for strength and durability | Heat and UV stabilised for Australia's harsh conditions | 9 ft (2.75 m) diameter | Puncture and impact resistance | Tear resistance | 10 % Stretch for tight packing | Stretch indicator on bag

| Code | Brand | Diameter | Length | Thickness | Bags/Pallet |
|------------|--------------|----------------|--------|-----------|-------------|
| 1100011591 | RHINO - Pro7 | 9 ft (2.75 m) | 75 m | 250 um | 8 |
| 1100011592 | RHINO - Pro7 | 9 ft (2.75 m) | 90 m | 250 um | 8 |
| 1100013159 | RHINO - Pro7 | 10 ft (3.05 m) | 100 m | 250 um | 6 |

Custom Sizes Available

Custom sizes are available and come in diameters of 9 ft (2.75 m), 10 ft (3.05 m) and 12 ft (3.66 m) and lengths up to 150 m. We can make custom sizes to suit your needs. Please allow 12 weeks for delivery of custom orders.
